A shot in the arm. Impande High School was the recipient of science kits donated by SAB. The kits were officially received and handed-over by the MEC for Education in KZN, Mr Senzo Mchunu to the school at a special ceremony held on 25 July 2013.

Teaching and learning of Science will now be a breeze for the learners and educators at school. Attending the special event with the MEC for Education, Mr ES Mchunu was Mrs Champion from the uThungulu District Municipality. The event formed part of the Mandela day celebration. The United Nations in November 2009 officially declared 18 July as Nelson Mandela International Day. The UN in its declaration has recognized Mandela’s human values, his dedication to duty, service to humanity, acknowledging his contribution to the struggle for democracy internationally and promoting a culture of peace throughout the world.

The celebration of Mandela Day aims to serve as a global call to action, for people to recognize their individual power to make an imprint and help change the world around them for the better.

Nelson Mandela has been making an imprint in the world for 67 years, starting in 1942, when he first started to campaign for the human rights of every South African. His life has been an inspiration to the world. By devoting 67 minutes of their time – one minute for every year of Mandela's public service – people can make a small gesture of solidarity with humanity and a step towards a global movement for good.
