PART A

GENERAL INFORMATION

SECTION 1

VISION AND MISSION

Vision

A literate and skilled society capable of participating in all democratic processes and contributing to the growth and development of the people of KwaZulu-Natal.

Mission

To provide opportunities for all our people to access quality education which will improve their position in life and contribute to the advancement of a democratic culture in KwaZulu-Natal.

SECTION 2

POLICY STATEMENT BY THE MEC

MRS CM CRONJÉ

The Department of education is in its 4th year since the inauguration of the five year master strategic plan. In 2007 we introduced a three year strategic document as part of the necessary review that we had to undergo in line with the national education strategic framework. As we continue to implement and evaluate our plan our attention will be more on what must change as a result of our work and not just on “doing things”. This operational plan is meant to indicate how certain problems will be addressed as plans or solutions to our challenges. Our operational plan will in the best possible way spell out the chosen path that will effectively and realistically get us the results we have agreed upon. In introducing this operational plan let us not forget that our department like all others exists primarily to ensure that practical resources are applied to improve the quality of life of our people.

The Department has seen a dramatic improvement in textbook deliveries against the backdrop of an audit report of 2005 which found that only 149 (4.6%) of non-section 21 schools had received their textbooks. We recall that last year 85% of non-section 21 schools received their textbook before the first day of school. When schools reopened on 14 January 2008, more than 95% of the 3211 non- section 21 schools had received their textbooks. In comparison this is an improvement of 10% from 2007.

The department of education intends to pay more attention to the foundational skills of early literacy and numeracy. In addition to the packages to the value of R4 600 per class, each class will also receive R1500 to attend to local needs. The “No Fee” school policy was introduced that children of all school going age have access to education. The allocation per child per annum in quintile one will be increased this financial year 2008/9 from R629 to R775 and from R560 to R711 in quintile two.

The 2008/09 financial year will see the lowest teacher ratio in KZN of 1:31.18 from April 2008. This will see the overall appointment of 3000 more teachers. The multi-term agreement – the first of this nature in the country – will also come into effect in 2008 and will ensure that the staffing of public schools proceed in a climate of certainty and stability with minimum disruption of the organisation and administration of public schools. According to this agreement teachers will only be redeployed again in 2010, provided that no significant changes in numbers are experienced.

The year 2008/09 will see the intensification of our reading strategy, this means that parents must be encouraged to switch to buying books for their children and as a department will play our secondary role of ensuring that the reading policy is adhered to in all schools. On this we cannot afford to rest even a second as the result of the systemic evaluation has shown that we are struggling in this area.

It is the intention of this department to ensure that no children bunk class and found in streets during school time. All officials of the department must ensure that we get children to class on time on task for 201 days of the school calendar.

It is therefore with great pleasure that I table this operational plan.

Mrs CM Cronje
MEC: Education KwaZulu-Natal

SECTION 3

OVERVIEW BY THE SUPERINTENDENT-GENERAL

RC LUBISI (Ph D)

There has been good progress in positioning the Department to effectively provide access to education opportunities to the populace of KwaZulu-Natal and to ensure that they all have access to relevant and quality education despite the challenges facing the province.

In our endeavour to build a Department serving the needs of the 21st century; 2008/09 is yet taken as journey to prosperity undertaken through taking small steps, each step being critical and taking us closer to the destination. 2008/09 is thus a milestone year to incrementally solidify our foundations for service delivery in the second decade of democracy within a legal framework and statutory mandates.

In developing and reviewing the strategic and operational framework of the Department, we have ensured compliance to legal and quasi-legal statutory mandates of which the Department is the custodian in order to guarantee that the established benchmarks and apex points for the department's strategic direction are relentlessly pursued.

A notable strategic shift will be for the Department to rigorously ensure compliance to measurable objectives and performance measures; determine performance indicator measurements and objectives which is as per Auditor-General's requirements.

Based on the review of our strategy, to ensure alignment with policy priorities of the national and provincial government and to respond to identified provincial needs; we are cognisant that for us to fully utilise opportunities for the benefit of all our people, we need to improve on our efforts in addressing the provision of access to education opportunities while relentlessly pursuing quality education for all.

To this end and in line with the public service obligations, the functional realignment of the structure for optimisation of service delivery, centred around reviewed mandates and priorities, is pursued. We remain convinced that these developments will chart the way in successfully implementing intermediate and specific measurable milestones along the road to accomplishing set goals and mitigate challenges experienced.

It needs mention that the realignment is undertaken within the overall strategy of providing access to quality education, particularly for the poor, to incrementally develop the professional capability of our educators and to increase efficiency and effectiveness all round.

The Service Delivery Improvement Plan is a vehicle for our strategy to ensure improved service delivery at all levels of the Department including schools. The established Service Delivery Transformation Committees is an undertaking for

effective and efficient service delivery all round.

On the basis of the strategic goals of the Department and taking cognisance of the various policy directives articulated by the President of the Republic of South Africa, the National Minister of Education, The Premier of the Province of KwaZulu-Natal and the MEC for Education in the Province of KwaZulu-Natal, this Operational Plan places particular emphasis on the following priority areas for 2008/09 financial year.

- Ø The Implementation of “no-fee” schools
- Ø National Literacy Campaign
- Ø Roll-out of Grade R towards the Realization of 2010 Goals
- Ø Implementation of QIDS-UP
- Ø Infrastructure Provision
- Ø Consolidation of Rural and Farm schools
- Ø Learner Transport
- Ø Learning and Teaching Support Materials
- Ø Strengthening of Administration
- Ø Improvement of the Education Management and Information Systems
- Ø ICT Roll-out
- Ø Employment of Administrative and Security Personnel
- Ø The Implementation of National Curriculum Statement in grade 12
- Ø Focused Implementation of Systemic Evaluation
- Ø Teacher Development and Allocation of Bursaries to Upgrade Teacher Qualifications
- Ø Support for Unsuccessful Candidates in 2007 Senior Certificate
- Ø New Areas in Examination Functions
- Ø Provision for Office Accommodation
- Ø Curriculum Implementation
- Ø Reading Skills
- Ø Priority Skills for 2010 World Cup
- Ø Early Childhood Development: 0-4 years old
- Ø Recapitalisation and Support for Historically Disadvantaged Boarding schools
- Ø Occupation Specific Dispensation

The Department will in 2008/09 continue to consolidate existing interventions, programmes, and Apex Priorities. The following is the list of Apex Priorities:

- Provide all schools in poorest quintiles with basic resource package of appropriate books and materials for learners and teachers; support staff; assistance with management and governance of resources.
- Massively speed up the implementation of the ECD programme; expand the number of training staff and double the number of sites.
- Implement intensive campaigns to meet targets for water, sanitation and

- 
- electricity.
- Address governance and operational matters pertaining to capacity in FET Colleges to meet skills requirements.
 - Introduce a pledge that will be recited every morning in all schools based on part of the preamble of the constitution and on a commitment to human solidarity and humane conduct.

In concise summary, the Department's performance in relation to its measurable objectives and Performance Measures is as indicated below:

Implementation of No-Fee Schools

In January 2006, the no-fee schools policy was implemented, following the national policy directive issued by the Minister of Education. The policy is intended to benefit learners in the poorest 60% of schools by the year 2009, improve access to learning opportunities, particularly to indigent communities and assist the Department in meeting the Constitutional obligations of providing access to adequate basic education. The Department began implementing the policy in 20% of the poorest schools at the beginning of the school year 2006, benefiting a total of 1342 schools. Last year, an additional 1999 school were direct beneficiaries of the no -fee school policy, resulting on an overall coverage of 3341 schools and impacting on 1 170 965 learners. The province is planning to fund schools at the target rate of R775.00 for Quintile 1 schools and R711. 00 for Quintile 2 schools in 2008/2009, representing a higher threshold level of funding.

Masifundisane Literacy Campaign

The Department has been implementing the Masifundisane Adult Literacy campaign since 2006. At the end of 2008, 370 000 adult learners out of 1,2 million illiterate adults, would have benefited from this campaign. The target for 2008/09 is to double the number of adult learner benefiting from the campaign with a view to eradicating illiteracy by 2010. In order to increase access to the programme, teaching and learning programmes have been developed in IsiZulu, IsiXhosa and Braille. By the end of 2008, the programmes will be in the four dominant languages including Sesotho.

Roll-Out of Grade R towards the Realization of 2010 Goals

The Department of Education has embarked on a process of rolling out Grade R towards the implementation of White Paper 5 on Early Childhood Development. According to White Paper 5, "all learners entering Grade 1 would have participated in an accredited reception year programme" by 2010. The draft Norms and Standards for Grade R funding that prioritises poorer communities and schools in the poorest quintiles provide a guide for the Department in blazing ahead with the implementation of this policy.

The norms also recommend that the Department should attempt to fund Grade R learners at a per learner allocation that is between 50% and 70% of the total per learner costs in public ordinary schools. Currently, the Department allocates R27 100 per Grade R class for all costs, which is far below the desired minimum of at least 50% per learner costs in public ordinary schools. The Department is making every endeavour to move towards the minimum of 50% in the next three years. A process of analysing the financial implications is currently under way and the Department expects to present a memorandum to Cabinet in the near future.

Implementation of QIDS-UP

This project focuses on improving educational outcomes in historically disadvantaged schools. A national allocation of R40 million has been made available for 2007/08 for the QIDS-UP.

By its very nature, QIDS-UP requires an integrated approach to planning and in this regard integrated strategies have been developed to co-ordinate activities across the various programmes that have a bearing on public ordinary schools. Basic resources have been supplied to quintiles one and two schools in the Obonjeni and Umzinyathi districts. These have included the following: providing basic reading material, ECD kits, science kits, schools' feeding schemes, and box libraries for Dinaledi schools, providing appropriate grade R classroom resources such as toy cabinets, carpeting and infrastructure repairs and fencing. Further attention will be given towards re-sourcing and developing under-resourced schools during this financial year.

Infrastructure Provision

Addressing the infrastructure backlog estimated at 12500 classrooms and 209 schools without adequate sanitation in 2008, continues to present massive challenges for the Department. Although the Department has increased the pace of delivery, the elimination of the backlog remains elusive. As we chip away at the backlog, natural disasters such as storms and fires, leave trails of destruction of school infrastructure, thereby adding to the backlog. In addition, the growth of the construction industry has not kept abreast with the demands of the build environment particularly in the public sector. Using emerging contractors from the pool of youth and women entrepreneurs has presented the Department with new opportunities to reach a broader contractor base.

The department is faced with another challenge in so far as the provision of office accommodation for its officials is concerned. Currently, the budget does not provide adequately to address this area of concern. It is expected that with the increased allocation for infrastructure these concerns will in time be addressed.

Over the last few months the Department has focused on increasing the pace of infrastructure delivery, improving infrastructure planning capacity and financial management and developing human resource capacity. In addition, the Department's focus on improving working systems and relations with the primary implementing agent, the Department of Public Works, has improved delivery.

The infrastructure allocation of R1, 126 billion for 2008/09 will be used to address historical backlogs and new demands.

During the next MTEF period the Department will continue implementing its Infrastructure Delivery Plan. The Fast-Track Programme characterised by the use of SMMEs and cooperatives in the construction of education infrastructure will be consolidated and refined. The prioritization of women and youth-owned construction companies will receive a further boost. The MEC took a policy decision to incorporate the following issues in the infrastructure development plan:

- The consolidation of rural and farm schools;
- Provision of learner transport, particularly in high priority areas;
- Conversion of ordinary schools to full-service schools; and
- Upgrading of historically disadvantaged schools with boarding facilities.

Consolidation of Rural and Farm Schools

Due to various reasons such as the depopulation of rural areas, the effect of birth control and the impact of HIV and Aids in different parts of the province, educational facilities are no longer viable in providing quality education. These therefore need to be rationalised. However, the Department is acutely aware that any reduction in the geographical distribution of educational facilities is likely to lead to a decline in accessibility and diminished opportunities for the learners concerned. The Department intends rationalising some schools without disrupting access to affected learners. Where schools are rationalised learners will be either transported to superior facilities or provided with accommodation in schools with boarding facilities.

To this end the Department has engaged the services of the Human Sciences Research Council (HSRC) to undertake an analysis of all the schools in the province and to develop a model that can identify targeted schools for consolidation based on school sizes, distances and accessibility statistics (that is the percentage of pupils within a given radius from a school).

Rationalisation of Small Schools

In the first instance, the strategy will involve the rationalisation of small schools to create bigger and economically viable schools. The immediate benefit for learners will be the allocation of teachers to the schools in terms of the Post Provisioning Norms, and the direct allocation of funds as per the Norms and Standards for School Funding. Although the allocation of resources are primarily in favour of the poor, schools that have fewer learners receive lesser resources than their counterparts because the funding formula is based on the number of learners. By creating bigger schools in rural areas and farms, as well as in areas where the demand for schools has declined, the strategy will ensure that resources are not spread too thinly thus

have no impact whatsoever.

Boarding Facilities

The Department has identified several institutions as suitable sites where a few farm schools could be merged into a single large institution. Most of these institutions are former colleges of education that became under-utilised after the government decided to move teacher training to universities. The institutions have the necessary infrastructure such as water, electricity and boarding facilities – and would therefore require very little structural changes.

One such institution is Sukuma High School, which has been identified as a first site at which the Department will pilot the strategy. The Department will identify rural and farm schools in a given radius around the area and transfer learners and teachers to Sukuma. Resource provision will be based on the number of learners in accordance with key policies of the Department. In addition, the Department will finance the operations and upkeep of the hostels so that the costs are not shifted to the learners.

Learner Transport

The constitutional right of any learner denoted that access to education should be enjoyed by all. Non provision of learner transport impede on the rights of learners to education.

In rural areas some learners walk distances in excess of five kilometres each way to school and back thus impacting negatively on attendance and completion of their schooling. The Department has taken a policy decision to provide transport to learners of deep rural, farms and under-serviced areas. This however can only be done extensively as more and more funds become available from the fiscus.

Piloting of learner transport has been done in one cluster and the experience gained will need to be replicated in other areas. R49 million has been set aside for learner transport for the 2008/09 financial year. Schools of Learners with Special Educational Needs will benefit R21.2 million from this allocation.

It is estimated that R1 billion is required for this Province to adequately address the issue of learner transport. Therefore a developmental approach will have to be adopted by the Department to providing learner transport.

Learning and Teaching Support Material

The Department achieved almost 100% delivery of Learning and Teaching Support Material (LTS) at non-section 21 schools when schools reopened in January 2008. Ninety five percent (3069 schools of the 3211 schools) received 97.95% of their

textbooks at the end of November 2007.

The provision of LTSM to schools is a priority in the Province. This is clearly evident in the increased budget allocation for LTSM. Over the past three years the budget allocation for LTSM has doubled. In 2008/09 a budget of R785,6 million has been allocated for LTSM. Textbooks are essential in the implementation of the National Curriculum Statement (NCS). The current requirement is to provide one book per subject or Learning Area per learner.

A budget of R903 729 million has been allocated for the 2008/09 academic year. For the first time non-section 21 schools were given special functions to purchase stationery. Principals were trained on the procurement process and it is pleasing to report that all schools that received stationery allocation did procure stationery successfully. Research on LTSM being considered by governments across the world as one of the important instruments for promoting equity, redress and quality learning for all in the public education system has found resonance in the KwaZulu-Natal department of Education. SGBs, Principals and all officials involved are commended.

The Department aims to sustain and improve on the success achieved in providing all learners with textbooks on or before the first day of any academic year. A formal structure in the form of a dedicated Directorate to manage the procurement of and provision of LTSM will be established. Greater attention will be given to monitoring the availability of textbooks in Section 21 schools.

Strengthening of Administration

Plans are in place to realign the organisational structure of the Department with a view to further strengthen administrative, management and financial systems to improve service delivery. Certain functions would be decentralised to expedite decision making and service delivery. This will result in the creation of new units in some areas to adequately address the strategic goals of the department. District functionality remains a key area of focus, in particular infrastructure provision, resource allocation and educational support.

Education Management Information System (EMIS)

A national EMIS project (South African Schools' Administration and Management System (SASAMS) is being rolled out in the province. The project aims to improve data quality and integrity in all the provinces to ensure that the data is as accurate as possible and enables the Department to plan, monitor and report on the status of education in the province.

In addition, the Department is also implementing a 3-year EMIS Improvement Project that is driven nationally to address the shortcoming of the current EMIS systems

and to provide for the implementation of the Education Information Policy. The two interventions will run concurrently and will complement each other in improving the critical processes ranging from data collection to reporting.

During 2008/9, the enhancement of the critical sub-systems of EMIS will continue. It will include the following:

- Implementation of the South African Schools Administration and Management System (SASAMS) that will enable schools to better manage their records. This will in turn, assist in improving the quality of the data obtained from schools.
- Roll-out of the Learner Unit Record and Information Tracking System (LURITS), which will enable the Departments of Education nationally to track learners as they enter the system, move from one school to another and from one province to another until they exit the system.

Funding for EMIS has been significantly increased so that the Department can improve its human capacity not only to report on the education system but also to interrogate other databases such as the Census, and Labour Force Survey. The Department has received an additional allocation of R36 million for the roll out of the SAMS and LURITS.

ICT Roll Out

In terms of the Policy on e-Education, the Department has to provide infrastructure, that is, connectivity and computers to schools, professional development of educators and the development of digital content. The Department also has to research and integrate Information Communications Technology (ICT) into the Curriculum in both GET and FET bands. The rollout of ICT requires a budget of approximately R2.5 billion. The Department has a challenge to have all learners and educators in the GET and FET bands ICT capable by 2013.

The unique challenges in respect to the province's rurality, lack of communications infrastructure, backlogs with regards to physical resource and the topography of the province, impact on the provision of e-Education in the province. Notwithstanding this, the Department with a total budgetary allocation of R204 million, has up to 2008 been able to provide 50% of the schools in the province with at least one computer for administrative purposes, train 2400 educators in ICT and equip 800 educators with International Computer Drivers Licence (ICDL).

Employment of Administrative and Security Personnel

In pursuit of the departments' drive towards quality improvement in schools, it has created 270 administrative clerks and 2980 security guards posts which will be allocated to public school in Quintiles 1 and 2. This will ensure the strengthening of administrative support at schools and also raising the level of security.

Focussed Implementation of Systemic Evaluation

In 2008, this project is aimed at strengthening the system's ability to provide regular, credible and up to date data on learner achievement. It expanded the scope of evaluations in terms of frequency, sample size and grades that were covered. The Department participated in two National Surveys namely the Systemic Evaluation and the SACMEQ Evaluation. To expand the scope of evaluation in terms of grades, all public schools with grade 2 and 4 at Obonjeni District have been evaluated in order to inform the QIDS-UP programme and to improve the quality of learner attainment.

Teacher Development and Allocation of Bursaries to Upgrade Teacher Qualifications

One of the consequences of the implementation of the New Curriculum Statement is the shortage of teachers that are adequately qualified to teach the new curriculum. It is estimated that the province needs about 3000 new entrants annually into the teaching profession and the current supply is inadequate to meet the demand. With the release of the National Framework for Teacher Education and Development (NFTED) in 2006, the department is striving towards ensuring the implementation of the NFTED through Initial and Continuous Professional Teacher Development programmes. In addition to the Fundza Lushaka bursary scheme, the department intends increasing the number of bursaries to students in Mathematics and Science teacher education programme, increase the number of ACE bursary holders and to introduce a teaching assistant programme at the foundation phase. The teaching assistant programme which will be over a two year period will equip and assist the teaching assistants in acquiring accreditation to enrol for the teacher training degrees at local tertiary institutions.

Support for Unsuccessful Candidates in the 2007 Senior Certificate

With NATED 550 curriculum having been phased out in 2007 there is a cohort of learners that were unsuccessful in the 2006 and 2007 Senior Certificate Examinations. These learners cannot be accommodated within the New Curriculum Statement (NCS) although they will still be allowed to write the examinations until 2011 school year. Therefore there is a need to provide support in the form of tuition and LTSI for these learners. In this regard, the strategy adopted by the Department is to provide centralised teaching centres and educators. This support will continue until 2011. The Department has made contingency arrangements to assist these learners.

The capacity of the examinations unit is not commensurate with the increasing responsibilities mentioned above and the Department will be developing a Master Plan for the management of examinations in the province.

Provision for Office Accommodation

To increase focus on service delivery, the Department was restructured with a view to provide a decentralised education service to the province as a whole. This therefore has necessitated the provision of accommodation from Head Office right to the circuit level. Currently, the staff at Head Office operates from five buildings in Pietermaritzburg and three others in Durban thus impacting negatively on service delivery. Furthermore, most district offices are overcrowded as a result of the restructuring process with 10 of the 12 districts functioning in offices that have been leased. The Department is in the process of acquiring its own offices either through new constructions or purchasing existing office buildings. Staff accommodation particularly in the rural districts makes it difficult to recruit and retain staff and there is a dire need to provide staff housing to mitigate the risk of losing qualified and skilled employees.

Curriculum Implementation

Focus in the next MTEF cycle will be mainly towards supporting the educators to prepare learners for the writing of the first National Senior Certificate in 2008. To ensure that there is successful implementation and support for the National Curriculum Statement in Grades 10 to 12 the following plans are in place. In the GET band special educator development programmes will continue to be conducted for educators in rural and farm schools to equip them with skills in dealing with Multi-grade classrooms and the teaching of reading.

Reading Skills

International Research (PIRLS, SACMEQ evaluation) reveals that the Literacy level in the country is very low. The need to improve Literacy skills is a priority at both a national and at a Provincial level. Reading is a crucial activity within the Provincial Literacy Strategy. The strategy has activities within the implementation of the Curriculum in all public schools however there are focused projects and initiatives to improve reading. During this financial year much emphasis will be placed on the teaching of reading skills and to improve educational outcomes throughout the system so that learners will be better equipped to cope with the rigours of tertiary education and the world of work. Readers for grades 1-7 have been procured for the QIDS-UP focus schools. In 2008 all Foundation Phase educators will receive training on the Reading Toolkit. This training will develop and enhance educator competence in the teaching of reading.

A key expectation of the National Foundation for Learning Campaign is to ensure that learners read during a dedicated reading period. The implementation of this campaign will enhance and promote reading. The ELITS section has developed a Reading Policy and has issued a directive to schools to make provision within the instructional time to reading.

Priority Skills for 2010 World Cup

The soccer World Cup of 2010 will provide an excellent opportunity to showcase the province to the multitude of visitors coming from all parts of the globe, not only to enjoy the soccer spectacle that Africa will be hosting for the first time but also to take in the beauty that the province has to offer. In this vain, the FET colleges are expected to train the youth to seize the many job opportunities that will arise. Training will be provided in the following areas: tourism ambassadors, interpreters and all jobs related to the hospitality industry and transport industries.

Early Childhood Development: 0-4 years old

Research in respect of early childhood development indicates that the crucial period for cognitive and psycho-motor development is between birth to around six years of age. The Department has been making steady progress towards affording universal access to all learners in Grade R into public sponsored facilities; however the competence of provision for children below this age category belongs to the Department of Social Welfare. From 2008 the Department is expected to take the lead in providing learning and teaching resource material for children in the age category 0-4 years. An amount of R21, 6 million has been set aside for this purpose during this financial year increasing to R97 million in 2010.

Recapitalisation and Support for Historically Disadvantaged: Boarding Schools

The Department has in the recent past received several delegations from principals of historically disadvantaged schools with boarding facilities complaining that since the amalgamation of the erstwhile Departments their schools had not been prioritized by the Department for upgrade and maintenance. This year R12 million has been ring-fenced for the recapitalization of historically disadvantaged boarding schools. This amount is in addition to the infrastructure budget that may also be used to address some of the urgent repairs at these schools.

Occupation Specific Dispensation

The total estimate for the implementation of Occupation Specific Dispensation 2008/09 is R600 million. However in anticipation of the OSD for the educators in January 2008, a sum of R60,7 million was set aside for retrospective payment for the last quarter of the 2007/08 financial year. The OSD will improve salaries for certain categories of educators and other support staff as well as providing career pathing. This has been finalised by the signing of the collective agreement at the

ELRC for the immediate implementation and back dated to January 2008.

Special Schools and Inclusive Education

In line with the constitutional imperatives to provide access to basic education, the Department is rolling out a strategy for the implementation of Inclusive education in an effort to increase access to education particularly for learners experiencing barriers to learning. R40 million has been allocated to particularly deal with Inclusive education, which will be used towards the establishment of new special schools, conversion of special schools into resource centres in order to accommodate inter alia out of school learners with profound disabilities and the conversion of 48 mainstream schools into full-service schools which will accommodate learners with a range of barriers to learning.

New Areas in Examination

In addition to the Senior Certificate examinations, the Department undertakes the following assessments and evaluations:

- Common Tests in grade 11 and 12 on a quarterly basis.
- Common tasks for Assessment (CTAs) set by the Department of Education and administered to all Grade 9 learners in the province.
- Preparations are on the way for the administration of the national senior Certificate (Grade 10 to 12) in 2008.
- Strengthening internal assessments at schools.
- Examinations for adult learners administered twice a year in June and October.
- Whole School Evaluation and Systemic Evaluation in Grade 3, 6 and 9.
- The national strategy for Learner attainment which focuses results in grade 12.
- Conducting the examinations for the province.

The above priorities have set out in detail the Measurable Objectives, Performance Measures, Targets and Key Performance Areas over the 2008/09 financial year as presented in this comprehensive 2008-2009 Operational Plan.

As a Department of Education in the Province, we stand committed to proving the required leadership and guidance in channeling education reach its full potential.

In the realisation of our primary goal of “Getting KwaZulu-Natal learning” we are committed in the persuance of the service delivery priorities collectively.

RC Lubisi (PhD) – Superintendent-General
KwaZulu-Natal Department of Education

SECTION 4

STRATEGIC GOALS

The strategic goals of the Department – as they appear in the Strategic Plan 2005/10 – are as follows:

Strategic goal 1

Provide high quality, relevant education to all learners, regardless of age, which will equip them with knowledge, skills, values and attitudes to meet the challenges of the 21st century.

Objective 1.1. Implement a relevant curriculum to support life-long learning

Objective 1.2. Provide educator capacity development for all phases

Objective 1.3. Provide resources to meet identified needs across the phases

Strategic Goal 2

Transform the Department into a 21st century learning organisation focused on results, high performance, effective communication and quality service delivery.

Objective 2.1. Implement an effective performance measurement system throughout the Department

Objective 2.2. Ensure that Batho Pele principles are implemented to achieve service excellence

Objective 2.3. Ensure good corporate governance

Strategic Goal 3

Transform schools and colleges into self-reliant and effective learning institutions that are also community centres for life-long learning.

Objective 3.1. Create an environment that supports effective teaching and learning

Objective 3.2. Develop schools to obtain Section 21 status

Objective 3.3. Develop well resourced facilities

Objective 3.4. Encourage community participation

Strategic Goal 4

Develop the Department's human resource capacity to meet the highest standards of professionalism in line with the requirement of the Employment Equity Act and other transformation targets.

Objective 4.1. Ensure sustainable capacity building programmes

Objective 4.2. Develop leadership, management and governance skills at all levels

Objective 4.3. Promote employment equity

Strategic Goal 5

Provide and utilise resources to achieve redress and equity, and to eliminate conditions of physical degradation in institutions.

Objective 5.1. Source additional funding for non-personnel expenditure

Objective 5.2. Develop and vigorously implement a plan to eradicate infrastructure backlogs in schools

Strategic Goal 6

Eliminate fraud, corruption and mal-administration.

Objective 6.1. Promote a corporate culture of ethics, professionalism and accountability supporting well controlled systems

Objective 6.1. Develop a well-resourced, competent and responsive investigative unit

Strategic Goal 7

Deal urgently and purposefully with the impact of the HIV and AIDS pandemic as part of an integrated Provincial response.

Objective 7.1. Develop a management plan to deal with the impact of HIV/AIDS in the workplace

Objective 7.2. Develop programmes to counter the negative effects of HIV,AIDS in schools and colleges

Objective 7.3. Ensure the intergration of life-skills across the curriculum to combat HIV/AIDS and other health and social threats/hazards. Provide resources to meet identified needs across the phases

SECTION 5

CORE FUNCTIONS OF THE DEPARTMENT

The core functions of the department are summarized as follows:

Public Ordinary Schools:

The servicing of public ordinary schools is the Department's primary function. In the main this entails the allocation of human resources, the development of educators to ensure that they are equipped to provide the best quality teaching and the provision of learning and teaching support material. The provision of new schools and learning facilities, effective maintenance of existing facilities, the incremental strengthening of schools to meet minimum standards of epistemological access, as well as monitoring of the quality of education services are also core to the Department's responsibilities. Lastly, the function also includes the National School Nutrition Programme, which is a nutrition scheme for public primary school learners who are from the poorest communities.

Independent Schools:

The Department also has a responsibility to ensure that certain Independent Schools are also supported in the province. In this regard, subsidies are provided to independent schools that cater for learners from disadvantaged communities.

Public Special Needs Education:

This programme provides additional support services for learners requiring moderate to high levels of special needs education in accordance with tenets of Education White Paper 6. This programme aims to provide support to public special and full-service schools.

Further Education and Training:

This service is aimed specifically at providing market-related skills to ensure that out of school learners are employable on completion of training at this level. FET Colleges provide a range of relevant programmes to learners of various ages and interests. The provision of skills should enable successful learners either to enter the job market or to start their own businesses and create employment opportunities for others.

Early Childhood Development:

Early Childhood Development is aimed at strengthening pre-grade 1 education and providing universal access to all learners by 2010. The policy intention is to prepare learners to cope with the rigours of formal education.

Adult Basic Education:

This programme seeks to eliminate adult illiteracy, improve average levels of education attainment and provide the skills necessary for adults to contribute to the growth of the economy.
